

RIMEX BEAD BREAKERS

Building better wheels

Designed to prevent the tool from “kicking out” and causing injury, RIMEX produces the strongest, safest, most stable bead breaker in the industry. RIMEX bead breakers will break even the most stubborn earthmover tire bead.

15 - Ton Bead Breaker Single Jaw Design

The single hook design breaks the tire bead from a solid back section or flange without damaging the tire.

RIMEX universal jaw now included.

P/N 785-000-0001

25 - Ton Bead Breaker Dual Jaw Design

The dual jaw design of the 25 ton breaker gives the tool more power when required. The 25-Ton breaker is available in 6” stroke and 10” stroke models.

Two RIMEX universal jaws now included.

P/N 785-000-0045 -6” Stroke

P/N 785-000-0061 -10” Stroke

The custom made universal jaw (supplied with each tool) allows the bead breakers to be used in numerous wheel applications. The solid grip and rigidity provided by the custom jaws, breaks the tire bead from the back section or bead band of the rim without damaging the tire or rim components.

Please refer to RIMEX Bead Breaker Safety Guide for Operation and Safety instructions.
